# Technovation[MN]

## What is Technovation[MN]?

Technovation[MN] offers girls in Minnesota the opportunity to learn the necessary skills to emerge as tech builders, entrepreneurs and leaders. Each year, Technovation[MN] inspires 10-18 year old girls to work together to dream up, design, code and pitch technology that solve local community challenges. We are currently offering programs to build mobile apps and smart device skills. In May, join us for a celebration and live pitch at Appapalooza.

## Who is eligible to participate in the program?

This year, the girls who join the program will learn industry-relevant skills from our community of over 300 mentors skilled in ideation, marketing, business development, user experience design, and software development. Access the curriculum online.

- Teams of up to 5 girls between the ages of 10-18 years old
- 12 week program commitment; 2-4 guided hours per week
- No prior programming experience is needed

## When does registration open?

Registration will open in December. Watch the registration page on the Technovation[MN] website for updates. Upon registration, the student will be paired with a team of mentors. Fill out the participation intent form to stay in the loop.

The cost for your students to participate has been covered by the generous support from our sponsors/partners.
